

DANNY NGUYEN

MELBOURNE, VICTORIA

tungduong9704@gmail.com | +61 452 073 568 | [LinkedIn](#) | [Github](#) | [Portfolio](#)

EDUCATION

Swinburne University of Technology

Melbourne - Australia

Bachelor of Computer Science (Major: Software Development)

2023 - 2025

- Relevant Coursework: Cloud Computing Architecture (AWS), Data Structure and Patterns (C#), Interface Design & Development (VueJS), Software Development for Mobile (Kotlin).

PROFESSIONAL EXPERIENCE

[Sonic HR](#) | *Level 1 Technician*

Feb 2025 - Present

Bendigo Bank Project

- Delivered IT support during national Bendigo Bank Windows refresh rollout.
- Imaged and deployed Win10/11 devices, joined AD domain, validated Group Policies.
- Configured Microsoft 365, network print services, mapped shared drives.
- Performed DNS/DHCP checks, VPN troubleshooting, gateway connectivity validation.
- Managed secure device decommissioning, asset tagging, and rollout documentation.

[Digital Village](#) | *Full Stack Software Engineer*

Feb 2025 - Nov 2025

- Developed decentralized governance platform using Web3, IPFS, and JS frameworks.
- Integrated smart contracts improving on-chain governance and proposal voting.
- Conducted technical evaluations on DAO frameworks with cost-efficiency analysis.

[Jung Talents](#) | *Software Engineer Internship*

Dec 2024 - Feb 2025

- Engaged in the [PTE Master](#) & build search enhancements using Angular.js, .NET, SQL, and AWS services.
- Deployed .NET apps in Docker, improving release reliability & developer workflows.

PROJECTS

[Olympic Climber Tracker](#) | Kotlin

August 2024

- Implemented mobile scoring app with real-time analytics & multilingual support.
- Integrated trackable gameplay data improving user engagement & monitoring.

[UFO Hunter Game Dev](#) | Ruby

Mar 2023 - May 2023

- Built real-time object handling with collision detection, hitbox logic, and frame-based animations.
- Implemented scoring and rendering systems using event-driven game loops for smooth gameplay.

[Cloud Computing Project](#)

Aug 2023 - Oct 2023

- Designed event-driven photo-app architecture using AWS Lambda, S3, DynamoDB, CloudFront & Route 53.
- Automated image processing and delivery through S3 triggers, queues (SQS/SNS), and Rekognition.

SKILLS

- Languages: JavaScript, Kotlin, Python, C#, SQL, Solidity
- Infrastructure: Active Directory, Azure AD, Intune, Windows Server, GPO, DNS/DHCP, VPN
- Tools: Docker, Git, Microsoft Endpoint Manager, PowerShell, AWS
- Software: Windows 11, Microsoft 365, PowerBI
